**Overland**

**\$615**

Model 75, Roadster \$595—f. o. b. Toledo

## A Powerful Five-Passenger Car---Complete Light, Easy to Handle, and Very Economical to Operate

From every state in the Union we hear of the amazing success of the latest Overland—the \$615 model.

And why not? An electrically started and electrically lighted, completely equipped Overland, with four-inch tires for only \$615?

Season after season for seven years the Overland factory has experienced one great success after another.

But this one tops them all.

The \$615 Overland has made history. It marks the entrance of a new automobile value—a car complete in every sense of the term at a price which was hitherto thought impossible.

Note that word "complete."

This means electric starter and electric lights, electric horn, magnetic speedometer—in fact, every necessary item. There are no "extras" to buy.

Note that the motor is the very latest en bloc design—the last word in fine engineering.

Note that the rear springs are the famous cantilever type. Cantilever springs mean the utmost in riding comfort.

Note the electric control buttons on steering column—demountable rims and one-man top. These are all big advantages.

The newest Overland is light in weight, easy to handle and very economical to operate.

It's just the car the world has been waiting for.

It is large enough for the whole family—moderately priced—built of the best quality materials—snappy, stylish and speedy.

You'll want one, so order it now. Don't wait, debate or argue with yourself.

Then in a few days you and your whole family will be driving your own car.
